* The courses required for the Community Health minor are available online via Blackboard and in the traditional classroom setting

Community Health Course Descriptions

HPE 212 Personal & Community Health (3)
The development of habits, attitudes, and knowledge concerning health, and the professional preparation of individuals for work in the community health field.

HPE 312 Health Problems and Disease Prevention (3)
The course provides an overview of health problems and disease prevention in today's society. An analysis of a variety of personal, social, community, and environmental factors is explored.

HPE 315 Foundations of Health Science (3)
This course explores a historical and philosophical study of the growth and development of health science, health education, and health promotion.

HPE 318 Health for Special Populations (3)
This course examines the nature and needs of special populations and explores current research regarding special populations to better understand the area.

HPE 360 School and Community Health Programs (3)
This course examines methods in comprehensive school health education for grades 6-12 and also explores community health program planning.

HPE 420 Health Aspects of Aging (3)
The physical, social, emotional, and mental aspects of aging of healthy aging will be explored.
