

Finding Resources for Entomology

Entomology is a topic that spans several Library of Congress subject areas. Therefore, print resources may be found on both the 9th and 10th floors of the library. Online resources are available whenever and wherever you have Internet access.

BOOKS held by the library, both print and electronic, are found by searching the online catalog. A few examples are listed below. Relevant subjects may be found in the following call number ranges:

- QL 461-599.82
- RA 1063.45
- SF 517-593

JOURNALS/SERIALS held by the library, in both print and electronic format, may be found by searching the online catalog under the journal title. Current print journals are on the shelves next to the librarian's office, while bound volumes are on the south side of the 9th floor. A few examples include:

Annual Review of Entomology, QL 461 .A56 (print/online)

Ecological Entomology (online)

Journal of Insect Physiology, QL461 .J87 (print/online)

Finding Journal Articles in online databases

Relevant databases include: *Biological Sciences*, *Elsevier Science Direct*, *Biological and Agricultural Full Text (Wilson OmniFile Full Text Mega)*. Others that may be useful include *PubMed* and, *Academic Search Premier*

Finding full text articles

If the library does not subscribe to the journal you need in print, or it is not available in the database you are using, **Serials Solutions** is another way to find journals. A new feature, Article Linker, lets you search for articles using a citation, ISSN, DOI or PMID
