Increase Testing Security

The **Office of Distance Education** is pleased to announce it has obtained a campus-wide pilot license for

Respondus **L**ock**D**own Browser™.

Respondus LockDown Browser™ is a customized browser that increases the security of test delivery in Blackboard. When students use Respondus LockDown Browser™ to access an exam, they are unable to print, copy, go to another URL, or access other applications. Once an assessment is started, students are locked into it until it's submitted for grading. This tool can be used in both traditional courses as well as distance courses.

The campus-wide pilot will be available for the **Spring 2008 term.**
