

Plans continue for a joint degree in computer science with Taizhou University, through a 1 + 2 + 1 program. The initial cohort of Taizhou University students will begin study in the English Language Institute in Summer 2010, with enrollment in JSU in Fall 2010.

The stadium expansion/residence hall project was started in November 2008 utilizing Volkert as Construction Manager. The project is scheduled to be completed in July 2010.

As we look toward our future, we will continue to set, and strive to achieve, the goals that will move the university forward by focusing on the following strategies:

- Continue to develop new online programs to serve the varied needs of our students.
- Continue targeted marketing and recruiting efforts for distance learning programs and with two-year college transfers.
- Involve the alumni in recruiting in targeted geographical areas.
- Continue to aggressively recruit, retain and provide services for international students.
- Develop virtual services for online and nontraditional students.
- Continue our efforts to gain approval to start our first doctoral program at JSU in the near future.
- Improve student activities and recreational facilities for traditional students.
- Work on attracting more scholarships and waivers to attract out-of-state students and increase the proportion of students most likely to succeed.
