

JaxBooks® Instructor Portal Guide

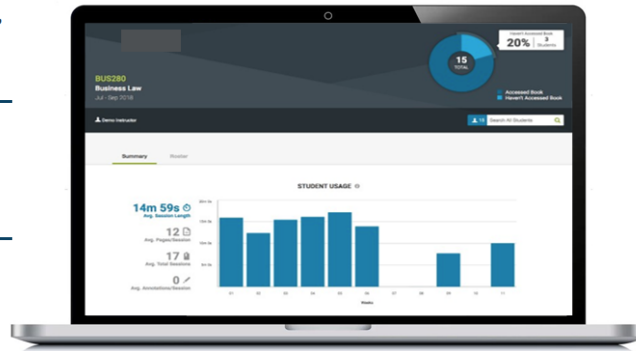

Through improved reporting features, instructors gain access to analytics data so they can review how students are interacting with their course materials and better manage class performance. This data becomes very powerful as instructors can now see which students HAVE the course materials, WHO is using the course materials and HOW the students are using the course materials. Ultimately, this data allows instructors to measure the effectiveness of their course materials by tying this data to learning outcomes.

INSTRUCTOR DASHBOARD

Aggregated key metrics such as: total students, total book access and average session length

Measure students' consistency throughout the semester

Ability to assess the effectiveness of eBooks by linking data to actual learning outcomes.

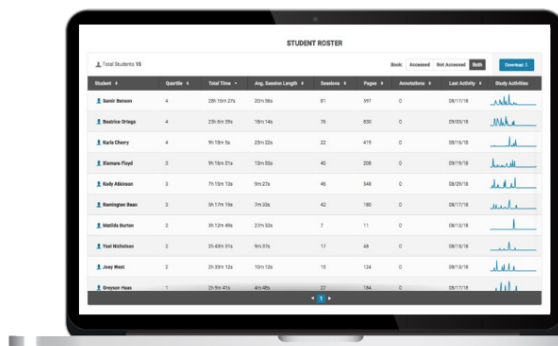

Student Insights with High-Impact Reporting Dashboards by Course & Individual Engagement

Powerful On-Demand student usage metrics

Engagement Groups to analyze how student engagement is distributed across all eBook courses.

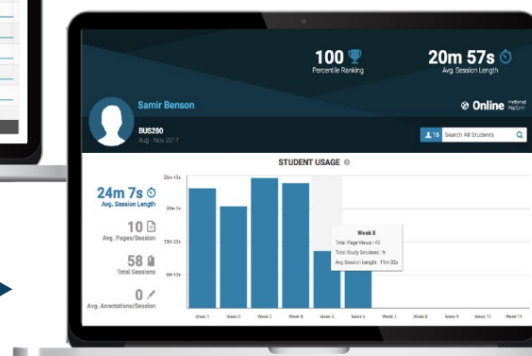

Faculty and administrators can now see which students HAVE the eBooks, WHO is using the eBooks and HOW the students are using the eBooks.

FACULTY AND ADMINISTRATOR TOOLS

The **Roster dashboard** gives the instructor a specific student to review their usage of the digital material. Can show information such as average session length and the student's preferred platform.

The '**Roster**' tab gives the instructor student roster data for their course. This report allows instructors to see student engagement with the content. This may identify students struggling with the content or not using it at all.

Roster Tab:

- Accessed (filter): The accessed filter allows instructors to identify students to have or have not accessed the content during the course.
- Total Time: the total amount of time the student engaged with course materials throughout the course.
- Sessions: the total number of study sessions completed by the student. Study sessions are delineated by 30-minute gaps in reading activity during the course.
- Pages: the total number of pages a student viewed during the course. Page views less than 3 seconds are not counted.
- Annotations: the total number of bookmarks, notes and highlights created in the content during the course.

Roster Dashboard:

- Percentile Ranking: This metric displays the current student's percentile within the context of the current course.
- Average Session Length: This metric displays the overall average session length for the current student's activities in the current course.
- Preferred Platform: this indicates the reading platform most used by the student.

To access the BNC FirstDay Portal:

1. Navigate to your Canvas course.
2. Click JaxBooks in the left navigation menu.
