HISTORY:

From modest beginnings, Jacksonville State University has evolved into the educational center of Northeast Alabama. The Alabama Legislature, in its 1882-83 session, created a state normal school when Governor Edward O'Neal signed into law a bill creating the school on February 22, 1883. Jacksonville State normal school acquired the facilities and equipment of Calhoun College, consisting of 12 acres of land and a two-story brick building. The Normal School remained in operation until 1930, when it became Jacksonville State Teachers College. Five years later, the college earned regional accreditation from the Southern Association of Colleges and Schools. In 1957, the name again changed to Jacksonville State College when the first graduate program - the master's degree in elementary education - was created. On August 2, 1966, the State Board of Education was authorized to elevate the college to university status. On August 17, 1967, the legislature established an independent Board of Trustees for the university and divested jurisdiction from the State Board of Education.

ECONOMIC IMPACT:

As of fall 2018, the direct local expenditures of the university, faculty, staff, legacy students and retirees are approximately \$364.9 million. This amount is composed of \$27.7 million spent by faculty and staff, \$85.1 million spent by students, \$185.6 million spent by legacy students, \$8.1 million spent by retirees and \$58.4 million (excluding wages and salaries) spent by the university. The direct impact of \$364.9 million with the multiplier or re-spending resulted in a total of \$620 million total economic impact. The university employs more than 1,100 persons in various faculty and staff positions. In addition to these jobs, 13,000 jobs exist because of direct and indirect university-related spending.
