

# "Fear the Beak" Pumpkin Carving Stencil

*IMPORTANT! Make sure that your Halloween stays "trick free;" carve your pumpkin only under adult supervision!*

**SUPPLIES NEEDED-** *This stencil, clear tape, a sharp kitchen or X-Acto knife, pin*

**INSTRUCTIONS-** *1. Print this stencil. 2. Cut the top off the pumpkin and scoop out the "guts." 3. Attach stencil to pumpkin using tape, carefully smoothing out the black area of the stencil so that it lays flat against the pumpkin. 4. With the pin, poke holes close together all along the outside edges of the stencil design. 5. Remove stencil. 6. Using your knife, carefully cut to connect the "dots" you created with your pin, making certain that you cut all the way through the pumpkin flesh. 7. Push out the flesh carefully to reveal your cool pumpkin design!*
